## ANGULAR

ANGULARDEVexp - Version: 1

 5 days Course

### Description:

The Angular team made the wise but difficult choice of starting over with Angular 2, rather than just patching the mature but increasingly fragile framework. From now on, it's Angular -- not Angular 1, 2, or 4. The new version is based on a modern approach, which prefers a more composable component model, reactivity, predictable data flows, type safety, embracing the wider ecosystem, and other current conventions and best practices. These changes represent a significant paradigm shift that is taking over the whole ecosystem. This Course introduces this new paradigm that underlies Angular, helps you set up a productive development environment, and teaches you how to build a well-structured app with Angular modules, components, services, pipes, forms and routing.

### Intended audience:

front end developers with good knowledge in o.o javascript

### Prerequisites:

### Objectives:

- Develop modern, complex, and scalable web applications with Angular
- Describe the architecture behind an Angular application and how to use it
- Gain deep understanding of the Angular fundamentals to quickly establish yourself as a frontend developer
- Create single-page applications with one of the most modern JavaScript frameworks

## Topics:

### Typescript & ES2015

- EcmaScript 2015
- Typescript

### Angular Introduction

- Getting Started
- Development Environment
- Angular Architecture & Concepts

### Component & Modules

- Components Overview
- Angular Modules
- Basic Components
- Application Bootstrapping
- Component LifeCycle

### Data Binding

- One-Way Data Binding
- Interpolation
- Property Binding
- Event Binding
- Special Bindings
- Two-way Data binding

- ngModel

## Directives

- Directives Vs. Components
- Attribute Directives
- Structural Directives

## Modules & Component Composition

- Component Input Properties
- Event Emitters
- Component Output Properties
- Custom Events
- Modules Composition
- Root vs. Feature Modules

## Services & Dependency Injection

- Dependency Injection in Angular
- The injectable Decorator
- Services & Providers
- Understanding Hierarchical Dependency Injection

## HTTP

- RxJS & Observables Overview
- Http Client
- Making Http Requests
- Handling Http Responses

- Error Handling
- Interceptors

## Angular Routing

- Routing Configuration
- Router Directive
- Child Routes
- Route Guards

## Pipes

- Common Pipes
- Custom Pipes
- Pure & Impure Pipes
- The Async pipe

## Angular Forms

- The Forms Module
- Template Drive Forms
- State and Validity
- Visual Feedback
- Model Driven Forms (Reactive Forms)

## Components & Directives In Depth

- Parent to Child Interaction
- Child to Parent interaction
- Content Projection

# Sela.

- Custom Directives
