Using the Power of AI and Data for Your Business Success

AIDATA - Version: 1

 3 days Course

Description:

The business world is changing rapidly, and the introduction of Artificial Intelligence greatly affects the world we live in, businesses and workplaces.

AI changes the rules of the game we know. Companies are required to adapt to the new reality that consists of data analysis using artificial intelligence.

In this workshop we will learn how to leverage Data and AI capabilities for business success.

The workshop is intended for managers who understand that the use of data and artificial intelligence will lead them and the organization to success

Intended audience:

Managers without prior background.

Managers who wish to leverage their knowledge to achieve a competitive advantage and business growth.

Managers who wish to challenge their employees to advance in the AI revolution.

Managers who want to acquire skills to use data and advanced technologies to achieve maximum business results.

Marketing and sales managers who wish to improve customer experience and take advantage of business opportunities faster and smarter.

Sela.
